

Heavy Duty, Efficient & Fully Optimised

**HIGH SPEED, PRECISE
FRONT LOADING BEAMSAWS**

- KS828C
- KS832D
- KS843D

Heavy Duty, Efficient & Fully Optimised

KDT – an introduction:

KDT are a major manufacturer of panel-based machinery with over 20 years of technical knowledge and experience. They export successfully to all major world markets a comprehensive range of Edgebanders, Beamsaws, Panelsaws, Flow through production lines, CNC routing and Drilling machines. Annual production exceeds 19,000 machines

Heavy Duty, Efficient & Fully Optimised

KDT KS Beamsaws - Size Panels the easy way

HIGH SPEED PRECISION FRONT LOADING BEAMSAW

Key Performance Parameters:

- The maximum height of the pack 95mm with 400mm blade
- 120mm.(with 450mm dia main blade)
- The movement of the saw carriage by means of a servomotor. Accuracy-Speed-Durability,
- The speed of the working stroke of the saw carriage is up to 1-95 m / min.
- The return speed of the saw carriage is up to 1-120 m / min.
- The speed of the programmable pusher is 95m / min.
- The programmable pusher is equipped with Pneumatic double-finger grippers.
- The working table of the machine with air cushion to avoid panel scratching
- Automatic blade and Beam height setting to match stack height for improved cut quality
- Grooving function on 832D and 843D models
- User friendly familiar PC control format

Heavy Duty, Efficient & Fully Optimised

A better work platform

CAD machine bed design with the maximum loads and requirements calculated and modelled

The welded frame is tempered to remove all internal stresses then machined on a five-axis CNC – including all mounting holes and plates

- 1 Heavy steel construction of top pressure beam with integrated dust extraction
- 2 Precision machining of mounting pads for large diameter guide rails ensure perfectly straight and smooth carriage travel.
- 3 Massive heavy-duty steel frame guarantees accuracy and precision.

Heavy Duty, Efficient & Fully Optimised

A better Saw unit

High precision over an extended working life.

High precision parallel rods with oversize guide rollers

Quick change blade lock / unlock is included – another KDT time saver

18.5 kw main

2.2 kw scorer

Heavy Duty, Efficient & Fully Optimised

Optimised work cycle saves time

Automatic cut height projection – to improve cut quality

Auto pressure beam height setting to match panel book height – saves cycle time

Auto saw carriage travel / pre-positioning to match panel length – saves cycle time

Grooving function

Programmed spacing and depth of Grooves – on 832D/843D models

Heavy Duty, Efficient & Fully Optimised

Fast and accurate side alignment

Dual side aligner movement is by rack and pinion and linear guide for maximum strength and accuracy, pressing panels against crosscut fence on both sides of pressure beam.

Side aligner positions at a fast 24m/min

- Heavy laser cut steel build for greater accuracy and precision.
- Soft rubber guide rollers eliminate panel edge damage.
- Side aligner travels on precision linear slide ways for years of trouble free service whilst providing the greatest accuracy.
- Oversize THK guides

Heavy Duty, Efficient & Fully Optimised

Saw carriage and Pusher travel by servomotor.

Heat treated precision rack and large diameter pinion drive for the saw carriage.
Powerful 2 kw SERVO drive ensures fast, precise saw movement and positioning.

Heavy Duty, Efficient & Fully Optimised

No scratching of delicate Panels

Air cushion in the work area eliminates scratching of sensitive Panels

Powerful parallel double finger grippers

Powerful air cylinders provide maximum gripping force.

Rubber tips will not damage panels while ensuring maximum grip on the panel surface.

Heavy duty cast aluminium gripper construction : years of trouble - free service.

Powerful grippers to guarantee panels will not move.

10 with 4200 model

8 with 2800 and 3200 Models

Precise pusher positioning via contact free Magnetic Strip reader

Heavy Duty, Efficient & Fully Optimised

Safe

Easy to reach machine Start /Stop and Emergency stop

Pressure beam stays up in an unexpected power cut . Interlocks on blade covers.

Top quality CE compliant Electrics and Electronics used throughout

User friendly WINDOWS working environment

Standard PC keyboard and mouse. Windows based Industrial PC controller. Graphic display showing each stage of the cutting process. Connect to office network for easy downloading of cutting lists from the KDT PreCut Optimization' software.

PreCut includes: Label printing formatting and output for Printer (Printer not included)

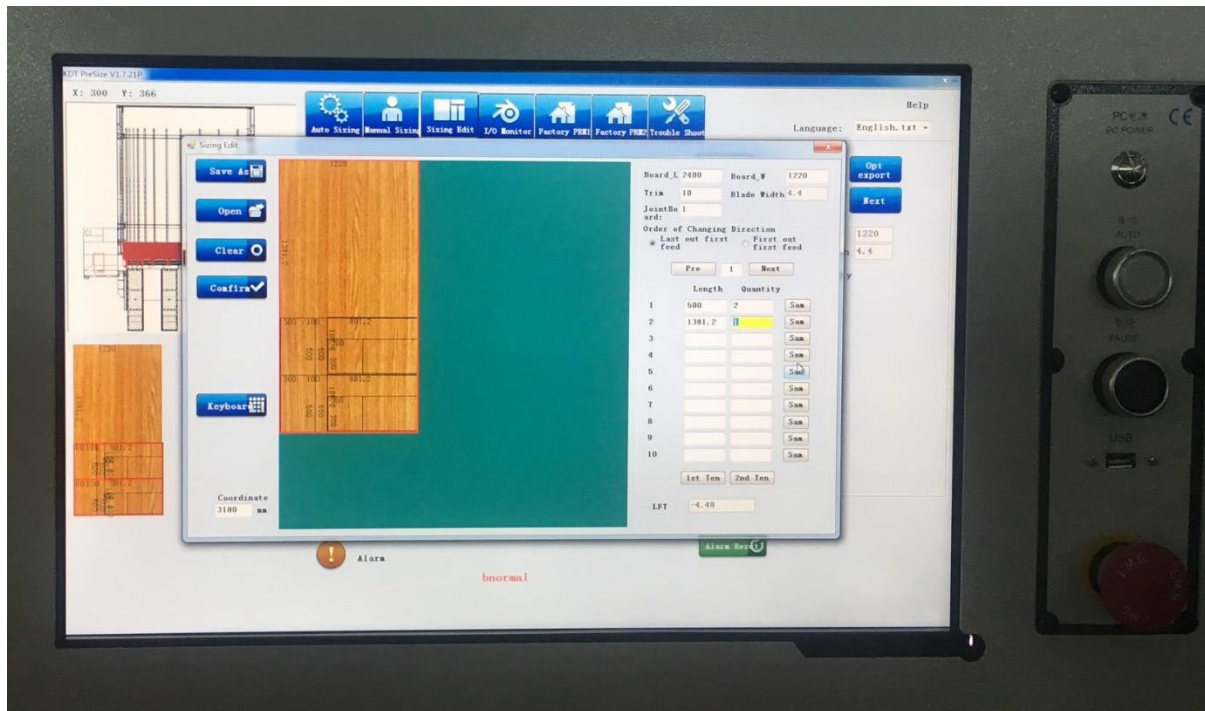

Import Cut lists from Excel for Optimisation.

Choice of Optimisation levels and Parameter mix.

Large 'user friendly' 19" screen

Heavy Duty, Efficient & Fully Optimised

Clear and modern graphic interface

Heavy Duty, Efficient & Fully Optimised

Key Specifications

- Industrial PC controlled with 19" colour screen LCD monitor, graphic user interface with optimizing software.
- 18.5kw main saw motor. Quick blade change system
- 2.2kw Scoring saw motor with manual saw adjustment.
- Powerful 2.2kw rack and pinion drive for saw carriage movement. Saw carriage running on precision round bars, rise and fall on round bars with linear bearings.
- Dual panel side aligners 90mm – 1300mm for fast accurate positioning.
- Automatic blade height setting adjusts according to the panel thickness for improved cutting quality.
- Three or Four air flotation support tables 1x fixed and rest movable with rollers for easier panel loading and to avoid scratching panels. The main table of the machine under the top pressure beam is fitted with air floatation to avoid panel scratching.
- 8 or 10 Dual finger Panel gripping clamps made from cast alloy with 120mm opening.
- Grippers positioned by precision Swiss made rack and pinion running on round guide, driven by a 2.2kw servo-motor and encoder.
- Latest Design heavy duty fabricated steel machine main frame, top pressure beam and side support tables to ensure accurate chip free cutting.
- Rear of machine guarded by enclosed safety fence 1.8 metres high with interlocking access door.

KDT Machinery offers Outstanding value for a

Return on Investment second to none!

Heavy Duty, Efficient & Fully Optimised

Dimensions, Power and Weight

Maximum cutting length	2830,3180 and 4280mm
Maximum cut height 400 / 450mm blade	95 /120mm
Cutting speed	0.5-95m / min
Saw return speed	120m / min
Max gripper speed	0.5-95 m/min
Main saw	405/450mm
Scoring saw	200 mm
Main saw motor	18.5kw
Dust extraction volume recommendation	5279 cubic m /hour
Scoring saw motor (1.5Kw on KS828C)	2.2kw
Saw carriage motor	2kw
Gripper servo-motor	2kw
3 or 4 Air floatation tables (2x movable)	
Required air pressure	7-8kg/cm ²
Net weight	6000- 6860 kgs
