

# 20" PLANER

The Power, Precision and Performance for heavy planing operations.

The **MB-508L** Planer provides a cutting capacity of up to 20" wide by a thickness of 8". With stock rollers provided on the top of the machine and in-feed and out-feed roller support, operation is easy and convenient. An oil-bath lubricated gear box provides very smooth

feeding and a lifting lever allows for easy maneuverability. The unit is the result of quality engineering which meets with CSA standards, with all components precision machined for complete interchangeability and added value.
