

Z28s/Z32s Dust extractor

Powerful extraction with Shaker Cleaning

Z28s - 20hp and Z32s - 25hp : Self Cleaning Industrial Dust Extractors with both a flow-through design filter and 'shaker' system to continuously clean filters during operation and shutdown. Perfect for workshops with CNC, Edge bander, Panel saw and still want more head room for future.

Features at a glance

- Galvanised steel body and waterproof filter covers. Can be installed indoor or outdoor
- Inverter control of fan speed saves power and reduces noise allowing you to match performance to demand.
- Cabinet doors on front of unit makes it easy to perform maintenance on filters.
- Flow through filter design assists with filter cleaning during operation and the **"Shaker"** system cleans filters on shutdown.
- High capacity airflow of 11000 m³ per hour (Z28s). Up to 18000 m³ per hour (Z32s).
- Pneumatic quick seal and unseal of your bin lid.
- Suits 1.5m cube bins or upgrade to 3m cube bins. (bins not included)
- Diameter inlet: Z28s (400mm)
Z32s (450mm)
- Compact footprint H 3714, W 1150, L 2250mm (4070mm incl fan) *(Z32s is 350mm taller)
- Fan motor can be re positioned to suit tighter spaces if needed.
